

DubaiX Whitepaper

Project Introduction

DubaiX is a digital city and metaverse project where users can become digital citizens, purchase virtual lands, and create virtual stores. Each land can serve as a platform for selling physical products, digital downloads, and NFTs. This project combines the metaverse, digital economy, and e-commerce, allowing users to simultaneously enjoy a .metaverse experience and earn real-world income

Project Goals

- .1 .Build a dynamic and active metaverse city with real and digital facilities
- .2 .Provide income opportunities for users through product and service sales
- .3 .Design a stable economic system using DUBAI and DMC tokens
- .4 .Develop a central digital marketplace connecting lands and stores
- .5 .Maintain transparency and security for users and investors

Token Details

DUBAI Token .1

- Standard: BEP-20 •
- Network: BNB Smart Chain •
- Contract Address: 0xaf7B5EA93A0AADEA145D36BF8ef7Df2Fc11ED3b0 •
- Decimals: 18 •
- Total Supply: 21,000,000 •
- Fixed supply, no minting •

DMC (Dubai Metaverse City) Token .2

- Standard: BEP-20 •

Network: BNB Smart Chain •
Contract Address: 0x995d36Bc5B21A1059963C398b513cc3032EAdB34 •
Decimals: 18 •
Total Supply: 21,000,000,000 •
Fixed supply, no minting •

Liquidity and Trading

- Tokens are traded on PancakeSwap
- Trading pair: DUBAI / BUSD
- Initial liquidity will be managed according to project growth
- Token and liquidity locking will be implemented in the future to ensure project stability and user trust

Key Features

1. Virtual Lands as Stores: Each land can become a virtual store for selling physical, digital, NFT, and downloadable products
2. Metaverse Experience: Users can navigate the digital city, visit lands and stores, and interact with other citizens
3. Digital Economy & Tokens: DUBAI and DMC tokens serve as the main currency and reward mechanism in the metaverse
4. Central Digital Marketplace: Starting in 2026, a comprehensive marketplace will connect all lands and stores
5. Transparency and Security: Smart contracts are fully auditable, and fixed token supply ensures economic security

Project Team

- Concept & Vision: Led by a team creating a commercial metaverse community for Dubai digital city
- Development & Design: Handled by independent programmers and designers
- Marketing & Promotion: Beginning in 2026, the marketing team will run wide-scale campaigns

Conclusion

DubaiX combines metaverse and digital commerce to provide a unique platform where users can enjoy a digital city experience and earn real-world income. DUBAI and DMC tokens are the backbone of this economy, and transparency, security, and future token locking ensure .project stability and user trust

Note: A portion of tokens and liquidity will be locked in the future to ensure long-term project .stability and investor confidence
